# COLOred Ceramics with high Absorbance and Solar Selectivity (IT)

Supported by:  
WR

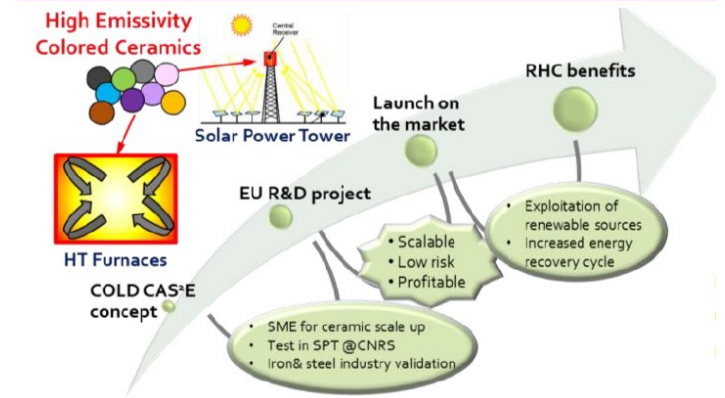

Support  
measure:  
Business  
Support

## DESCRIPTION OF PROJECT

**COLD CAS2E** studies novel high emissivity materials leading to energy efficiency by use of renewable energy in the field of solar exploitation and in refractory & metal production.

## DESCRIPTION OF SERVICE

W4RES will support COLD CAS2E in its efforts with targeted trainings on available and suitable funding opportunities. The support services will aim at providing the COLD CAS2E team with the resources and skills needed to valorise the innovative concept and the solid technical background within the framework of the EU R&I funding programmes.

# Project: Women Wanting Wool (IT)

Supported by:  
WR

Support  
measure:  
Business  
Support

## DESCRIPTION OF PROJECT

**Women Wanting Wool** is a team of three researchers with different but complementary expertise, collaborating towards building a sustainable vision for the wool value chain, including its applications related to energy efficiency in the construction sector.

## DESCRIPTION OF SERVICE

The collaboration with W4RES will leverage the business support services offered by the consortium to build solid foundations for the further development of WWW through an open document centred around a more sustainable use of wool. This joint undertaking will combine market research and value chain analysis in addition to other methodologies to collect and showcase contributions from the field.

# Action Energy Finance

Supported by:  
White Research

Support  
measure:  
Business  
Support

## DESCRIPTION OF PROJECT

**Action Energy Finance Oy** is a start-up based in Helsinki, Finland and founded in 2021. AEF licenses the Action Energy Market, which simplifies the purchasing process for small-scale energy improvement projects by bringing together energy project buyers (housing associations), energy services providers, and other stakeholders. AEF licenses its software platform as a Software as a Service (SaaS) to property managers, smart cities, and energy companies in the wider European market. Furthermore, the start-up is developing the Action Energy Finance Market which will offer to finance providers an access to investment deal flows from energy projects originated in the AEM.

## DESCRIPTION OF SERVICE

W4RES is assisting AEF with targeted market research and stakeholder engagement activities focused on exploring the potential for expansion in Belgium for the initiative.

# Second Life of Wind Turbines

Supported by:  
White Research

Support  
measure:  
Business  
Support

## DESCRIPTION OF PROJECT

**Second Life of Wind Turbines** is a women-led project coordinated by Victoria Semiannikova aiming at integrating circular approaches in the disposal and valorization of wind turbine blades at the end of their lifecycle. Currently in its initial stage of technical and business development the project sets out to explore possible commercial application for the reuse of wind turbines with a focus on renewable energy and sustainability.

## DESCRIPTION OF SERVICE

W4RES is assisting the Second Life of Wind Turbines with targeted market research business planning activities focused on taking the initiative from its current ideation phase one step closer to its realization identifying business opportunities & challenges.
